

Pier 1 Imports Distribution Center

Location:

Aberdeen, Maryland

Size:

639,000 SF

Owner / Developer:

Pier 1

Role:

General Contractor

Building Type:

Distribution Center

About This Project:

- The largest of four distribution centers built by Bob Moore Construction, Inc. for Pier 1 Imports.
- Tilt-up construction allowed this project to be constructed on a negotiated, fast track basis in order to meet Pier 1's critical deadlines.
- It features 30' clear heights and ESFR fire protection system in the warehouse area. This allows for high stacking without the use of in-rack sprinklers.
- Pier 1's largest single distribution center, this building covers 639,000 square feet, the equivalent of 13 football fields.
- Located on both sides of the building are 78 loading docks in a cross dock configuration, allowing shipping on one side and receiving on the other.
- In addition to Baltimore, Bob Moore Construction has constructed Pier 1 distribution centers in Savannah, Georgia, Rancho Cucamonga, California and Mansfield, Texas for a combined 1.7 million SF.
