

# UPS Air Cargo Distribution Center

**Location:**

Dallas, Texas

**Size:**

340,000 SF

**Owner / Developer:**

United Parcel Service

**Role:**

General Contractor

**Building Type:**

Distribution Center

## About This Project:

- Located at DFW Airport, the technologically advanced distribution center is designed to accommodate 19 jet aircraft including Boeing 757s, 767s and 747s. Portions of the facility are more than 60 feet tall.
- Upon completion of this 340,000 SF building, it was capable of handling 46,000 parcels per hour on a state-of-the-art conveyor and sorting system.
- Since that time, UPS called on Bob Moore Construction to expand the distribution center by 24,000 SF. Thanks to that successful expansion project, production increased in excess of 20 percent.
