

American Airlines Flight Simulator Center

Location:

Fort Worth, Texas

Size:

130,000 SF

Owner / Developer:

AMR Corporation

Role:

General Contractor

Building Type:

Flex / Tech

About This Project:

- Bob Moore Construction was the general contractor for this two story, multi-use office facility, built immediately adjacent to the American Airlines Corporate Headquarters campus in Fort Worth, Texas. The facility was built to house flight simulators for pilot training.
- Due to critical deadline commitments made by American Airlines, both to their own forces and to other airlines, the facility had to be completed on a fast track basis. The project was completed ahead of schedule and all commitments were met.
- The building consists of a pleasing blend of concrete tilt-wall panels as well as glass storefronts and curtainwalls.
- When timing is crucial, the Fast Track method of construction is an excellent solution. In addition to American Airlines, Bob Moore Construction has successfully worked with other large corporations in this format.
