

Rooms To Go

Location:

Arlington, Texas

Size:

851,000 SF

Owner / Developer:

Logan Dallas Associates, LP

Role:

General Contractor

Building Type:

Distribution Center

About This Project:

- With almost 15 football fields of interior floor space, the facility houses massive, five-level shelving units to efficiently organize and store millions of dollars in inventory.
- Circling the facility are 126 separate loading bays, allowing warehouse employees to load dozens of orders onto 18-wheelers simultaneously.
- The 6" concrete floor was poured in 32 individual pours, and the entire slab was water cured.
- The building's walls are comprised of 194 separate concrete tilt-up wall panels.
- The property's irrigation system is fed mainly from rain water collected from the 19.5 acre roof, making the new facility friendly to the environment and the local neighborhood.
