Role:

Design / Build

Building Type:

Retail

About These Projects:

- Construction in Grand Prairie completed in less than four months.
- Lewisville store was built using tilt-up concrete construction; however, local building codes required 100% masonry facade. Employed a new technology called Brick Snap to create a brick finish on the tiltwall panels as they were poured.
- Lewisville store used a hybrid of the traditional design/bid/build and design/build approaches.
