

Legacy VI & VII

Location:

Plano, Texas

Size:

245,508 SF

Owner / Developer:

Lincoln Property Company

Role:

General Contractor

Building Type:

Office / Flex Tech

About This Project:

- Bob Moore Construction was the general contractor for Legacy VI and VII.
- Legacy VI includes two flex-tech buildings; each building is 60,428 SF. The buildings include aluminum awnings and a dramatic white exterior paint scheme.
- Legacy VII is a 124,652 SF two-story office building. Like the two buildings in Legacy VI, the exterior of Legacy VII is finished with a white paint finish and textured salt walkways. The building's corners include large spandrel glass curtainwall windows. The lobby is finished with glass, steel, wood and tile to create a dramatic, modern design to the building's common areas. Two grand entrances also feature large spandrel glass curtainwall windows covered by aluminum awnings. A grand stairway made with steel steps protruding from a tiled wall leads visitors to the second floor balcony which overlooks the front entrance.
