

Legacy IV Flex / Tech Buildings

Location:

Plano, Texas

Size:

179,200 SF

Owner / Developer:

Lincoln Property Company

Role:

General Contractor

Building Type:

Distribution Center

About This Project:

- Bob Moore Construction was the General Contractor for these three flex-tech shell buildings in Plano, Texas.
- Legacy IV was the final phase of a 15-building project that started in 1998.
- The Legacy IV buildings feature extensive windowing all around the structures.
- Two of the buildings were designed as offset rather than rectangular structures.
- These flex tech buildings were created using tilt-up construction.
- Approximately 600 feet of graduated stone gravity retaining walls were created to offset the varying topography.
- This project was submitted for the Environmental Star of Excellence Award – Green Building category by the City of Plano's Commercial Recycling Coordinator.
