

Sherwin Williams Distribution Center

Location:

Waco, Texas

Size:

440,000 SF

Owner / Developer:

Bradford Companies

Role:

Design / Build Contractor

Building Type:

Distribution Center

About This Project:

- With more than 10 acres under roof, Bob Moore Construction built this Sherwin-Williams Distribution Center in only 166 days.
- In addition to the warehouse area, the facility contains a 60,000 SF liquid cutoff room for storage of environmentally sensitive liquids. This room is capable of containing large, industrial spills.
- Also, a 20,000 SF separate building was built for highly flammable storage.
- The environmental and fire protection controls of this facility include a full foam sprinkler system and a 1.5 million gallon liquid spill containment.
- The Sherwin-Williams Distribution Center is an excellent example of the safety and security features that can be built into a tilt-up building.
